

P I L L A R

Ransomware Prevention

Checklist

MULTI-FACTOR AUTHENTICATION
protect all accounts, especially financial

STRONG ENDPOINT DETECTION AND RESPONSE
detect the anomalies

SECURITY AWARENESS TRAINING
educate users

IMMUTABLE BACKUP
isolate data from normal IT operations

PATCH MANAGEMENT
if you can integrate it into your vulnerability program, even better!

VULNERABILITY MANAGEMENT
continuous evaluation of your infrastructure

NextGen SIEM (MXDR)
if you can't correlate your entire stack, you will miss something

IDENTITY
password less is coming, are you ready?

ADMIN
remove admin rights from everyone, use privilege solutions

EMAIL SECURITY
can you remove this as a threat, cloud computing will help!

NextGen FIREWALLS
inspect outbound traffic for anomalies

ZERO TRUST REMOTE ACCESS
explicit permissions vs. open access

NETWORK DETECTION AND RESPONSE
east west visibility for on-prem security concerns

SLEEP BETTER WITH
PILLAR MANAGED SECURITY
