

PILLAR TECHNOLOGY PARTNERS REDEFINES ROLE AS SECURE DATA INNOVATOR TO DRIVE AI AND BUSINESS OUTCOMES

Atlanta-based cybersecurity leader expands focus to align AI, analytics, and security for measurable business impact.

Atlanta, GA — August 12, 2025 — *Pillar Technology Partners*, long known for its cybersecurity leadership, today announced a bold evolution—positioning itself as a **Secure Data Innovator**. This strategic shift highlights Pillar's deep commitment to helping organizations unlock the full value of their data with AI, analytics, and security solutions that work in concert to solve business problems and drive competitive advantage.

"Innovation without security is risk. Security without innovation is stagnation," said Skeet Spillane, CEO of Pillar Technology Partners. "As a Secure Data Innovator, Pillar delivers both—empowering our clients to move fast and safely in a data-driven world."

Pillar's approach reflects its belief that **data is the lifeblood of every business**, and that successful innovation requires both data intelligence and airtight protection. With strong business acumen and technical depth, Pillar aligns AI, data optimization, and data protection strategies to real-world outcomes that improve decision-making, enhance operational efficiency, and position clients to lead in their industries.

As a Secure Data Innovator, Pillar helps organizations optimize and secure the data that moves their business forward.

To meet growing demand for data activation and secure AI deployment, Pillar has established a partnership with Microsoft as a **Microsoft AI Cloud Partner**. Additionally, Pillar now offers **AI Pathfinder**, a hands-on workshop that helps clients define and prioritize high-value AI use cases, and **Quickstart programs** that move initiatives from concept to execution in weeks—not months.

PILLAR'S EXECUTION-READY CAPABILITIES INCLUDE:

- **AI Activation & Implementation:** Technical depth to deploy enterprise-grade AI tools, like Microsoft Copilot, into secure, production-ready environments.

- **Pillar AI Pathfinder:** A guided workshop designed to define and validate AI opportunities aligned to strategic business priorities.
- **Quickstart Programs:** Focused AI engagements that move from idea to implementation in weeks—not months.
- **Data Optimization Services:** Clean, accurate, normalized and secure data that is AI and analytics ready, forming the backbone of secure information systems that support innovation.
- **Business Intelligence Buildouts:** Dashboards, predictive models, and insight engines that drive smarter decisions.
- **Enterprise Cybersecurity:** A full spectrum of security solutions protecting cloud, endpoint, network, and hybrid environments—ensuring that every initiative is secure by design and in step with emerging data security trends.

Cybersecurity remains a standalone pillar of Pillar’s value proposition. While data innovation is the frontier, trust remains the cornerstone. Pillar continues to deliver end-to-end cybersecurity solutions that safeguard digital assets and ensure compliance in high-risk industries.

“We’re proud to help our clients innovate with confidence,” added Skeet Spillane. “As a Secure Data Innovator, our role is to make your data usable, intelligent, and safe—so your business can move faster, smarter, and more securely.”
