

ARE YOU EXPOSED?

Know your vulnerabilities before a hacker exploits them

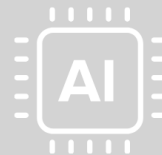

3 WAYS TO FIND SECURITY GAPS

Vulnerability Discovery & Prioritization

A.I. PEN TEST

RISK- BASED PEN TEST

PURPOSE	To identify common and known vulnerabilities in your environment	To advance beyond known and patchable vulnerabilities to discover compromised credentials, exposed data, poor security controls, weak policies, and misconfigurations	Sophisticated process exposing common, known and unknown vulnerabilities, and understanding the risks that apply to your organization
APPROACH	Automated scanning with ranking of vulnerabilities	Automated scanning and ranking of vulnerabilities and known exploits tested	Human curiosity combined with sophisticated tools drives this approach to identify and test exploits similar to real world cybercriminals
DURATION	Hours	Days	Weeks
RESULT	Vulnerabilities identified and prioritized	Vulnerabilities identified and prioritized. Known exploits tested	Vulnerabilities identified and prioritized. Known exploits tested to mimic hacker methodologies and mindset
